NUCLEAR PHYSICS A

CONTENTS

List of committees vii

Preface ix

PLENARY SESSIONS

Zooming in on the quark gluon plasma
T. Ullrich 1c

Properties of the quark gluon plasma: A lattice perspective
F. Karsch 13c

Soft-gluon resummation in the evolution of fragmentation functions
B.A. Kniehl 23c

PQCD approach to parton propagation in matter
I. Vitev 31c

Conical flow from quenched jets in sQGP
E. Shuryak 39c

High p_T hadron correlation and no correlation
R.C. Hwa 57c

High p_T measurements at the CERN SPS
C. Blume 65c

High p_T physics in PHENIX
W.G. Holzmann for the PHENIX Collaboration 73c

High-p_T physics in STAR
T. Peitzmann for the STAR Collaboration 81c

Nuclear modification of two-hadron correlations from HERMES
N. Bianchi for the HERMES Collaboration 93c

Nuclear effects in the dAu collisions from recent RHIC data
P. Lévai, G.G. Barnaföldi, G. Fai and G. Papp 101c

0375-9474/2007 Published by Elsevier B.V.
doi:10.1016/S0375-9474(07)00072-3

Comparison of 3-particle correlation methods
M. van Leeuwen 109c

Deciphering the properties of hot and dense matter with hadron–hadron correlations
A. Majumder 117c

Hadron correlations and parton recombination
R.J. Fries 125c

Flow effects on jet profile
N. Armesto 133c

High p_T physics in the forward region
M. Murray 141c

Multi-particle production at LO and NLO in AA collisions
F. Gelis and R. Venugopalan 149c

Jet-like correlations between forward and mid-rapidity
F. Wang for the STAR Collaboration 157c

A compact introduction to evolution at small x and the Color Glass Condensate
H. Weigert 165c

High energy pA collisions in the Color Glass Condensate approach
K. Tuchin 173c

Particle correlations in saturated QCD matter
A. Kovner 181c

Heavy quark production: Theory
M. Cacciari 189c

Heavy quark energy loss: Collisional vs radiative
M. Djordjevic 197c

Quantifying the prompt intermediate mass dimuon excess in the In–In collisions measured by NA60
A. David for the NA60 Collaboration 205c

Heavy flavor physics in STAR
P. Djawotho for the STAR Collaboration 211c

Open heavy flavor production in PHENIX
A. Dion for the PHENIX Collaboration 219c

Suppression of heavy quarks at RHIC/LHC
C.A. Salgado 225c

Suppression of heavy quarks in heavy-ion collisions
C.M. Ko and W. Liu 233c

Heavy flavor measurements at RHIC in the near future
N. Xu 241c

Quarkonium binding and dissociation: The spectral analysis of the QGP
H. Satz 249c

J/ψ suppression in In–In collisions at 158 GeV/n
R. Arnaldi for the NA60 Collaboration 261c

Quarkonium states at finite temperature
M. Asakawa 269c

Quarkonium at finite temperature
T. Umeda 277c

Quarkonium production in PHENIX
A. Bickley for the PHENIX Collaboration 285c

Quarkonium suppression from SPS to RHIC (and from $p + A$ to $A + A$)
R.G. de Cassagnac 293c

Quarkonium production via recombination
R.L. Thews 301c

Factorization for hadronic heavy quarkonium production
J.-W. Qiu 309c

Electromagnetic probes of strongly interacting matter
J. Kapusta 317c

NA60 results on the ρ spectral function in In–In collisions
S. Damjanovic for the NA60 Collaboration 327c

Direct photon and neutral meson production at Fermilab fixed-target energies
M. Begel for the Fermilab E706 Collaboration 335c

Fluctuations and photons
S. Gupta 343c

Intermediate mass dileptons in relativistic nuclear collisions
C. Gale and S. Turbide 351c

Electromagnetic probes in PHENIX
G. David for the PHENIX Collaboration 359c

Photon production in the Parton Cascade Model
S.A. Bass, T. Renk and D.K. Srivastava 367c

Elliptic flow of thermal photons/dileptons
U. Heinz, R. Chatterjee, E. Frodermann, C. Gale and D.K. Srivastava 379c

Jet energy loss and high p_T photon production in hot QGP
S. Jeon 387c

Photon and dilepton production at LHC
P. Aurenche 395c

Hard probes at LHC
B. Müller 403c

Charm and beauty at the LHC
A. Dainese 417c

Hard probes capabilities of ALICE: Jets and photons
A. Morsch for the ALICE Collaboration 427c

Hard probe capabilities of CMS in heavy ion collisions at the LHC
G. Roland for the CMS Collaboration 435c

Hard Probes 2006: Theoretical summary
U.A. Wiedemann 443c

Open questions in quarkonium and electromagnetic probes
C. Lourenço 451c

Open questions about jets and heavy flavor in heavy ion collisions
B. Jacak 461c

PARALLEL SESSIONS

Jet properties from di-hadron correlations in $p + p$ collisions at $\sqrt{s} = 200$ GeV
J. Rak for the PHENIX Collaboration 471c

Quarkonium spectral function from anisotropic lattice
A. Velytsky 477c

Heavy quark production in large rapidity in $d + Au$ collisions at RHIC
M.X. Liu for the PHENIX Collaboration 481c

Ground state quarkonium spectral functions above deconfinement
Á. Mócsy, P. Petreczky and J. Casalderrey-Solana 485c

Identifying bottom contribution in non-photonic electron spectra and v_2 from $Au + Au$ collisions at RHIC
Y. Zhang 489c

Heavy quark jet quenching with collisional plus radiative energy loss and path length fluctuations
S. Wicks, W. Horowitz, M. Djordjevic and M. Gyulassy 493c

Azimuthal correlations between non-photonic electrons and charged hadrons in $p + p$ collisions from STAR
X. Lin for the STAR Collaboration 497c

Ways to constrain the away-side jet in $Au + Au$ collisions in PHENIX
J. Jia for the PHENIX Collaboration 501c

Near-side $\Delta\eta$ correlations of high p_T hadrons from STAR
J. Putschke for the STAR Collaboration 507c

Three-particle azimuthal correlations
J.G. Ulery for the STAR Collaboration 511c

Hadron azimuthal correlations and Mach-like structures in a partonic/hadronic transport model
G.L. Ma, S. Zhang, Y.G. Ma, X.Z. Cai, J.H. Chen, Z.J. He, H.Z. Huang, J.L. Long, W.Q. Shen, X.H. Shi, C. Zhong and J.X. Zuo 515c

Extraction of jet topology using three particle correlations
N.N. Ajitanand for the PHENIX Collaboration 519c

3-D Jet Tomography: A probe of the hydrodynamic initial state in Heavy Ion Collisions
A. Adil and M. Gyulassy 523c

Two particle azimuthal correlations at high transverse momentum in Pb–Au at 158 AGeV/c
M. Płoskoń for the CERES Collaboration 527c

Away-side distribution in a parton multiple scattering model and background-suppressed measures
C.B. Chiu and R.C. Hwa 531c

From di-hadron correlations to parton intrinsic transverse momentum in proton–proton collisions
G. Fai, P. Lévai and G. Papp 535c

Suppression of high-p_T non-photonic electrons in $Au + Au$ collisions at $\sqrt{s_{NN}} = 200$ GeV
J. Bielcik for the STAR Collaboration 539c

Overcoming fragility
W. Horowitz 543c

Identified baryon and meson distributions at large transverse momenta from $Au + Au$ collisions at $\sqrt{s_{NN}} = 200$ GeV
L. Ruan for the STAR Collaboration 547c

Quark–quark double scattering and modified quark fragmentation functions in nuclei
B.-W. Zhang, X.-N. Wang and A. Schäfer 551c

Studying jets via identified particles in PHENIX
A. Sickles for the PHENIX Collaboration 555c

Hadronization in cold nuclear matter
A. Accardi 561c

High-p_T strange particle spectra and correlations in STAR
J. Bielcikova for the STAR Collaboration 565c

Direct photon production in Au + Au collisions at RHIC-PHENIX experiment
T. Isobe for the PHENIX Collaboration 569c

Baryon stopping in pA collisions
J.L. Albacete and Y.V. Kovchegov 573c

Direct photon production in $p + p$ and $d + Au$ collisions measured with the PHENIX experiment
D. Peressounko for the PHENIX Collaboration 577c

Dielectron production in $C + C$ collisions at 2 AGeV with HADES
W. Przygoda for the HADES Collaboration 583c

Coherent multiple scattering effect in DIS
X. Guo and J. Li 587c

Correlation between photons and charged particles in dAu collisions at RHIC
S. Chattopadhyay for the STAR Collaboration 591c

J/ψ production relative to the reaction plane in Pb–Pb collisions at 158 GeV/n
F. Prino for the NA50 Collaboration 595c

Author index 601c
